M.EXPRESS

DEPOSIT PAYOUT AND REIMBURSEMENT SYSTEM

M.Express gives clients immediate access to their refundable holding deposits, charging a 5% fee. The company holding the deposit then pays the refund directly to M.Express.

For example, on a R10,000 deposit:

• The client receives R9,500 immediately from M.Express.

• M.Express retains R500 as its fee.

• The company holding the deposit pays R10,000 to M.Express when the refund is released.

M.Express operates as a deposit payout and reimbursement system, maintaining a record of every claim, payment and acknowledgment.

Before the client is paid, the holding company confirms the approved refundable amount and agrees to reimburse M.Express. The client accepts a 5% fee, deducted from the approved refund. No additional fee is charged to the holding company.

How the system works

Step	Action	System record
1. Submit claim	The holding company submits the client's details, deposit reference, approved refund amount and supporting documents.	Unique claim number
2. Review and approve	M.Express verifies the claim and bank details. The holding company confirms its reimbursement commitment, and the client accepts the 5% fee.	Approved claim and accepted terms
3. Pay client	M.Express pays the client the approved refundable amount less the 5% fee.	Payment reference and proof of payment
4. Acknowledge receipt	The client receives a secure link to confirm the amount received.	Dated acknowledgment linked to the claim
5. Send reimbursement pack	The system sends the holding company the proof of payment, client acknowledgment of receipt, and invoice or reimbursement request.	Complete claim pack and payment due date
6. Collect and reconcile	The holding company reimburses M.Express for the full approved deposit amount. The payment is matched to the claim.	Claim marked settled

Example: R10,000 approved refund

Item	Amount
Approved refundable deposit	R10,000.00
M.Express fee - 5% deducted from the refund	R500.00
Amount paid to the client	R9,500.00
Amount reimbursed by the holding company to M.Express	R10,000.00

The reimbursement pack must clearly show the approved refund, the fee deducted and the amount paid to the client.

System interfaces

Interface	Functions
Holding company portal	Submit claims, upload documents, track payouts and view amounts due.
M.Express dashboard	Approve claims, process payments, generate documents, track outstanding reimbursements and reconcile receipts.
Client confirmation page	Review the payout and fee, accept the terms, confirm bank details securely and acknowledge receipt after payment.

Claim statuses

Submitted → Under review → Approved → Paid → Receipt acknowledged → Awaiting reimbursement → Settled

The system must also handle rejected claims, failed payments, missing acknowledgments and overdue reimbursements. A missing acknowledgment triggers follow-up while preserving the payment record and preventing a duplicate payout.
